Projects

https://nodejs-loginapp.herokuapp.com/

This is REST API hosted on Heroku build using Node.js, Express and Nodemon. API is also integrated with Front-end using EJS Template.

https://github.com/Anshul-Sonpure/RestAPI_Demo

Using a JSON-server created a simple REST API that performs all CRUD operations-GET/POST/PUT/DELETE and using this I created a POSTMAN Collection with basic assertion and data transfer property.

https://github.com/Anshul-Sonpure/Cucumber_Tutorials

A Cucumber Tutorial covering all the necessary topics and designed to perform the required scenario given from the Feature file.

https://github.com/Anshul-Sonpure/TokenBased_AuthAPI

This project implements JSON web token using JWT in Node.js to secure endpoints and even authenticate users.

https://github.com/Anshul-Sonpure/RestAssured_BDD

This project implements API testing using RestAssured and BDD approach. We can perform all operations GET, POST, PUT, PATCH, DELETE.
